## Instructions for USA Farmer.

Stick the two parts of the board together to make a grid.

Start at the bottom left of the board and work your way up the board like snakes and ladders.

Roll the dice to see how many squares you move each time.

Each player starts with a score of 50 beans.

On some squares, players will gain beans, on others they may lose beans. Keep track of your scores and why they happened (a score sheet is needed for each player).

The game ends when a player reaches the last square or if a player loses all their beans.

The winner is decided by who has the most beans at the end of the game. (To finish you only need to roll the number of squares to the end or higher. It does not have to be the perfect roll).

Have fun!

# USA Farmer Score Sheet

Player's Name:	
Total Beans	Reason for gain or loss
50
